WHAT IS MFC?

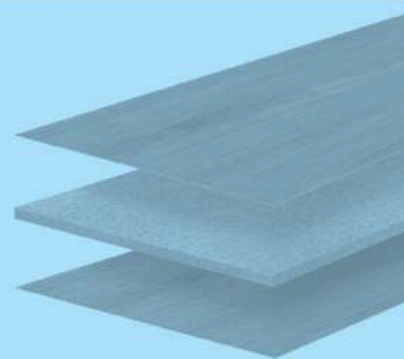

Melamine Faced Chipboard (MFC) is made of particle board that laminated with melamine paper. MFC is considered as an environmentally friendly because of the use of particle/chipboard but aesthetically versatile in use since the decorative melamine available in many collections to serve various projects. Including great variation in natural wood tone colors and textures to choose from.

KNOWLEDGE PLEASE!

MFC VS HPL BOARD

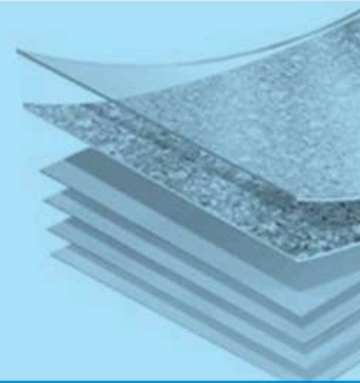

MFC also known as Low Pressure Laminates

- ✓ Ready to use. Already comes with the board.
- ✓ Low-cost and efficient in application.
- ✓ Easy maintenance & cleaning.
- ✓ Recently Developed (Innovative) Product

HPL High Pressure Laminates

- ✓ The board are not included. It comes separately.
- ✓ Higher cost but applicable to various hard surface.
- ✓ Stronger & more variety available.
- ✓ Popular in use since decades ago.

GOODBYE TO SWELLING!

RPI's MFC is using high quality Particle Board by RPI with superior advantage of preventing swelling. And with proper edging, You don't have to worry about swelling anymore!

High Quality Particle Board
& Melamine Faced Chipboard

PT. Rimba Partikel Indonesia's products align with the current market trend of using upcycled items with added value to nature.

We create our high-quality homogeneous particle board using local plywood raw materials sourced from PT. Kayu Lapis Indonesia (KLI) and many other wood waste obtained from the surrounding area.

RPI Production process control is based on JIS Certification standard, and we are proud to be the only company certified by it in Indonesia. We are also certified with various high quality standard manufacturer and product certifications that required by our clients, such as JIS U-13, CARB-P2, US-EPA, JIS M-18, JIS S-18, and FSC-COC.
