modern interior.

About MFC

Melamine Faced Chipboard (MFC) is a type of particle board coated with melamine paper. Known for its environmentally friendly nature due to the use of recycled wood particles, MFC also offers great design flexibility thanks to a wide range of decorative melamine finishes available to suit diverse project needs.

Advantage of MFC

Chemical & Stain Resistance

When introduced to chemical & stain exposure, MFC showing no marks or discoloration.

Scratch Resistance

In everyday use, MFC durability can withstand normal usage scratch and impact.

Heat Resistance

MFC also ideal to be used as furniture or decoration with heat source nearby.

Steam Resistance

Using MFC material on a kitchen set or minibar where steam or hot air flow is present without worry.
